With grateful thanks to 'Statista' - www.statista.com - who have complied and publicized these figures.

The United Kingdom stands at third worst in this report in terms of fatalities per million, as compared with many other countries with larger population, who are known to have avoided enforcing draconian 'lockdown' tactics. We seem to be taking advice from a very limited cadre of 'experts'. Meanwhile, in Germany, more than 500 medical doctors are clear that this is a false pandemic, in Spain, 600+ state that the existence of the 'virus' is not even medically proven to exist and has been promoted for political purposes. In the USA a documentary film - PLANDEMIC - has more than 27,000 medical doctors supporting it.

As early as 2015, in the Netherlands, Richard Rothschild patented '**A system and method for testing for COVID-19**' - by name - (COVID-19 is an acronym for 'Corona Virus Disease 2019' This nomenclature was appearing on sales and research papers in 2017. On Sept 5th 2020 the World Integrated Trade Solutions [WITS] altered the stock description from COVID-19 to read 'Medical Test Kits', but, alas, failed to vary the Product Code 300215 which still was showing 'COVIC-19 Test Kits'.

There was a much fuller publication of relevant details at - <http://tapnewswire.com> - which at the time of writing was 'not available'.

Information from the World Bank states that the COVID-19 'project' is planned to last until 31st March 2025: curiously, precisely the same date target appears on the front of today's (02.02.21) Daily Mail, courtesy of our Prime Minister..
