

5 reasons why so called 'vaxx-passports' are a bad idea:

- Vaccine passports are really digital identity and surveillance by another name. They discriminate against the poor and vulnerable.
- People should not be coerced into medical treatments in order to live life normally.
- Covid-19 is not a significant risk to most of the population according to the scientists.
- There is no current evidence Covid vaccines prevent infection or transmission according to the scientists.
- Covid passports make us digital slaves, do you want to live like Communist China?
