

Digital surveillance - it's happening now!

The video below at the foot of this article was recorded over a year ago.

To make things clear, if you are a user of **Facebook**, **Instagram** and/or **WhatsApp** you have agreed to their **terms of service**, which means that you have agreed to them having **access to all your data**, as well as agreeing they can take pictures with your devices, which **THEY THEN OWN**. They can also have all your banking and medical history, if you access that on a device, as well as see all your texts and messages from all other platforms.

Even worse, by being on those platforms in your own home, you tacitly agree to letting Facebook WhatsApp and Instagram to also access ALL other devices in your home, AND EVEN WORSE, if someone else uses those platforms within your home on your WiFi, then Facebook, Instagram and WhatsApp take that as their implicit permission to then access all your devices even if you are no longer on their platforms.

So, for instance, if for my security, I am not on any of those platforms but a friend comes to my house and uses my WiFi and goes on to **WhatsApp**, then all my devices, including my router, can then all be accessed going forward.

I am aware that **Telegram** and other apps **ask for permission** to access your camera etc, but this is different to what Facebook, WhatsApp and Instagram have done, which is complete overreach.

This is the start of the installation of the **social credit system** and hence if you are still on Facebook, Instagram and WhatsApp you really are putting yourself at a big risk.

Just imagine, you go on Facebook at home on your WiFi and now all your kids' devices and everything going over your router, your banking history, anything, can now be accessed by Facebook.

Or how about one of your employees goes on to Facebook in the office. Now Facebook are into your office modem and all your work history on all devices becomes visible to them.

So, I say it again, **get off those platforms**. Then you will have to change your router or factory reset it, and factory reset your phone and other devices, after downloading all important data onto an external hard drive.

Also be **VERY CAREFUL** about who you let have your WiFi password and what they access with it if you do.

If you want change and want their system not to succeed, get off those platforms. They are the channels through which the **vax passport** will be enabled and those platforms are actively taking the steps necessary to usher in a **social credit system**.

The below video [11 minutes] explains.

Footnote:

Now perhaps you can see the relevance of what Jerome Corsi (*qv on Wikipedia*) meant when he told his audience, three years ago -

“every single tap you make on your keyboard, be it your mobile phone, tablet, laptop or mainframe computer, it is all ‘harvested’ by the globalists and stored in some subterranean ‘barn’ where it is being used to create your digital Doppelgänger”

Please seriously consider that we must use every method possible to evade and defeat this globalist tyranny. If we allow **vaxx passports**, we are opening the door to 100% **digital surveillance and control** of our own (and our children's) lives.

With a hat-tip to ‘Lawyers of Light’ for a timely reminder of this awkward truth
